Forsyth

FORSYTH, the county seat of Taney county, is a beautiful and centrally located at the junction of the sparkling waters of the Swan with the swift and crystal current of beautiful White river. The site is ideal, and the little, well built and well painted city, fastened at the meeting of the waters like a gem at the throat of beauty, while the wooded ridges flank in every direction the central figure, all form a picture which lingers long in the memory of the visitor—and he usually comes back to refresh the picture.

The Presbyterian church has decided to locate here its college for southwestern Missouri and northwestern Arkansas, making of Forsyth a prominent college town. The fact that Forsyth donated a forty-acre site and over three thousand dollars toward the establishment of this school sufficiently indicates the attitude of our people toward the higher education. The fact that the committee representing the church required an option on an additional 120 acres of land affords some clue to the plans of the church.

We have a good graded school, a neat stone chapel open to all churches, a well supported union Sunday school, daily mails from all directions—in short, more advantages than many a more populous and wealthy community.

A steamer is soon to be placed on White river for freight and passenger service, with headquarters at this place, to make daily trips to the new town of Branson, ten miles west on the White River railroad. A mail and hack line with headquarters here, gives daily connection with the "Frisco System" at Chadwick.

Most lines of business are represented, including general merchandise, drugs, millinery, hotels, livery, lumber, meat market, undertaking, printing, painting, mulling, blacksmithing, carpentry, etcetera. We have an able and sufficiently numerous corps of lawyers, a good physician, and real estate work enough.

We need a resident dentist, a furniture store, a hardware store, a wood-working factory to utilize our native woods, and various other enterprises can find or make good openings.

Edward Camplin, Missourian.

The subscription of a peck of parched corn to Harvard college in the beginnings and poverty of New England has become historic. The fact that Edward Camplin who could neither read nor write, subscribed and paid \$3,000 to the state university of Missouri in its beginnings is as great a marvel and as such deserves commemoration.

Richard Kilby of Taneyville was a Monday caller at this office. He reports that of several hundred peach trees on his farm not a budbed tree will have a peach, though he will have a few seedlings. The same report comes from other parts of the county, but all agree with Mr. Kilby in reporting an excellent prospect for apples, pears, plums, cherries, strawberries, etcetera.

W. W. Jackson of Kirbyville re-enrolled his name on the Republican's big list at his town while in Forsyth Thursday of last week. He discontinued the paper not long ago, though he was properly warned that the eggs were not likely to hatch and the cats were almost sure to get into the cream, and all manner of disagreeable things were liable to happen if he cut off the county paper, and he has evidently been taught in the school of experience that it is an essential to comfortable housekeeping. At any rate he is welcome back to his old place on the list.

M. F. Jackson, one of the live farmers near Kirbyville, who came to town Saturday to attend a meeting of the directors of the joint stock company owning that king of horses, John Dalby, played a questionable trick on the printer. When he extended his hand in greeting the printer unsuspectingly gave him his right, and when he withdrew it two silver dollars looking as big as two full moons were left behind. The shock was not as serious as might have been expected.

Major George McCann, of Springfield, was in Ozark a short time last Friday. He had been to the park in Taney county to look after things there.
